

PREFACE CODING

NICOLA WONG

PROFILE

Having graduated from the University of East Anglia with First Honours in Computer Science, Nicola has accumulated vast experience through numerous software development jobs over the years. Additionally, Nicola has always held a strong passion for data science, which has seen her develop multiple projects related to the field of machine learning, deep learning and artificial intelligence.

Nicola's speciality in Data Science stems from her proficiency in a wide range of programming languages, some of which include Python, Java, JavaScript and SQL. She is also proficient in some of the more advanced libraries within these languages, such as Tensorflow with Python as well as ReactJS for JavaScript and web development.

Apart from being a software developer, Nicola's impressive yet effortless ability to communicate with both adults and kids make her a great teacher, especially when it comes to teaching something as complex as programming. She is also a very empathetic teacher, who is able to understand and adapt her teaching style according to the individual characteristics of each student.

EXPERIENCE

- Graduated from the University of East Anglia with First Honours in Computer Science
- Previous A.I. and Modelling Research Specialist at BT
- Developed a program for Music Genre Classification using deep learning models

“ There isn't a thing that cannot be learnt, you just have yet to meet the right teacher. ”
